

1. Raw material pump 2, three effect condensate preheater 3, three effect condensate buffer tank 4, one effect heating chamber 5, one effect separation chamber 6, two effect heating chamber 7, two effect separation chamber 8, three effect heating chamber 9, three effect separation chamber 10, three effect circulation pump 11. Three effect discharge pump 12, indirect condenser 13, three effect vacuum pump 14, secondary steam condensate tank 15. Condenser water pump 16, sodium precipitation tank 17, slurry tank 18, slurry pump 19, sodium chloride filter press 20, clear liquid tank 21, clear liquid pump 22. Squeezing water tank 23. Squeezing water pump 24. Single effect condensate preheater 25. Single effect condensate buffer tank 26. Single effect heating chamber 27. Crystallizer 28. Single effect axial flow pump 29. Exhaust gas preheater 30. Single effect vacuum pump 31. Single effect buffer tank 32, buffer discharge pump 33, lithium chloride centrifuge 34, single effect mother liquor tank 35, single effect mother liquor pump 36, dedicated quantitative feeder 37, disc continuous dry blasting machine 38, induced draft fan 39, electric heating heat transfer oil furnace system
